Allowable Subject Matter

1. Claims 1 – 3, 5 – 11, 13 and 24 – 33 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a system and method for setting up multimedia calls in mobile networks using an Internet Protocol (IP) transport mechanism.

Applicant's independent claims 1 and 24 – 33, each recites, *inter alia*, a method of setting up a communication session in a wireless communication network with a structure as defined in the specification (pages 7 – 14) including the request containing an indication to the first network element that radio resource allocation is to be prevented for the communication channel in the transport layer before the communication session in the application layer has been successfully established. Applicant's independent claim 1 comprises a particular combination of element, which is neither taught nor suggested by the prior art.

Accordingly, applicant's claims are allowed for these reasons and for the reasons recited by applicant in the amendment filed on 3/22/2006.

Regarding claims 24 – 33, the claims are interpreted and allowed for the same reason as set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
